

#### **TETRA Celebration Function: Sasolburg**

**TETRA celebration function**

*Project TETRA is a technologically advanced and reliable radio communication system, which proved itself during the recent shutdown. TETRA has been running for 2 years on the Sasolburg and Midland sites.*

*The project has come to an end and participants celebrated its successes with an evening function at the Emerald Casino. The majority of the current radio users have received new radio handsets and were trained to enable them to use the new radio as intended.*

*Fanie de Villiers, former Proteas Speed Bowler, entertained those attending with stories of his experiences with the South African Cricket team, much to the enjoyment of all present. The Project Manager, Christo Kriek, together with Fanie presented each Project Member with a letter of appreciation and a signed cricket ball.*

*Johan Hoolsema from Expert System Solutions received a certificate of excellence for their exceptional contribution to the project. Anton Redelinghuys and Jonas Mbongo from Sasol Infrachem, Electronics and Communications also received Certificates of Excellence for their commitment and dedicated service to the project.*
