Company Overview

E-S-S

Your Expert System Solutions Provider

Expert System Solutions (ESS) is a radio telecommunication and telemetry/telecontrol system expert and consultant with a high level experience and valued reputation in the mining industry, local municipalities, oil and gas industry, SAPS and communications network operators. ESS, based in Pretoria, was founded in 1999 with the main purpose of providing radio communication system engineering and supply of value added equipment such as remote monitoring and control.

ESS provides the perfect solution to the growing demand for wireless availability and efficiency. ESS monitoring and control products have been designed with emphasis on ease of operation, ease of maintenance and efficient way of handling data communications (low bandwidth utilisation).

ESS consists of three business units:

- Services (Communication consultant and system integrators)
- Products (Telemetry/Telecontrol, OPS Server, SCADA)
- Partner Products (Cell extenders, Crypto Phones, Various Applications)

ESS know-how for radio networks has been excellent and engineered 3 out of the 4 national MPT1327 radio trunking networks in South Africa (Transnet, Fleetcall and One-2-One) and four TETRA networks for the Oil & Gas Industry (Sasol Secunda & Sasol in Sasolburg), Anglo American (Sishen Iron Ore Mine) and South African Police Service (Eastern Cape Province).

ESS has an outstanding reputation with the supply and integration of telemetry/telecontrol solutions with government departments, various mines and municipalities (Sasol, Anglo American, SAPS EC, Ekurhuleni, Exxaro).
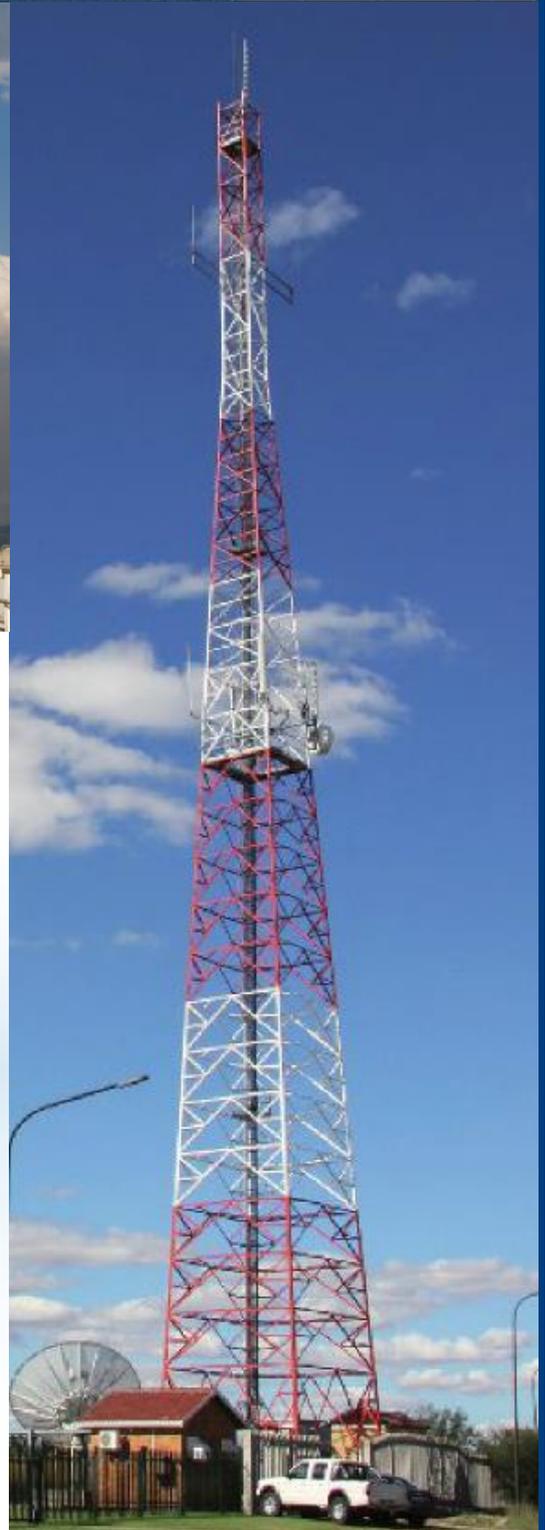

Your Expert System Solutions Provider

ESS provides Private Mobile Radio (PMR) network consulting services and system engineering for the following disciplines:

- Network system engineering
- Network capacity and loading studies (Erlang)
- RF (Propagation studies, intermodulation, etc.)
- High Site acquisition
- Project Management
- Supplier's recommendation and integration
- Network training and assistance
- Network maintenance
- Assistance with procurement for Communication Networks
- Assistance and recommendations for value added products
- Assistance with frequency, tenders and business-plan
- As-build Documentation
- Training
- Network Management
